## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1,6-8,11,14 and 16-19, drawn to a medical device (product), classified in class 206, subclass 438.
- II. Claims 20 and 22-24, drawn to a method of using a medical device, classified in class 206, subclass 438.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process of using that product, specifically, the product can be used by removing the medical device with a forceps or by hand.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mayumi Maeda on 22 February 2008 a provisional election was made **without traverse** to prosecute the invention of Group II, claims 20 and 22-24. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1,6-8,11,14 and 16-19 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

This application is in condition for allowance except for the presence of claims 1-19 and 26 directed to an invention non-elected without traverse and to species previously non-elected without traverse. Accordingly, claims 1-19 and 26 have been cancelled. Note that claims 2-5, 9,10, 12,13,15 and 26 are directed to a species non-elected without traverse in the election dated 30 July 2007.

Claims 1-19 and 26 have all been non-elected **without traverse**, and **all** are now cancelled as of the following Examiner's Amendment.

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-19 and 26.

Claim 20, immediately after line 2, *re-insert* the following lines:

-- providing a medical device package with a medical device contained therein and a connector, the medical device package including:

a body with at least one chamber defined therein, a proximal end, and a distal end; and --

Claim 20 as presented in the Amendment dated 15 January 2008 is erroneously missing lines 3-6 of the original claim as presented 31 March 2004. Lines 3-6 of claim 20 **were not** considered intentionally removed by the Applicant's Amendment dated 15 January 2008. Instead, as it is clear the Applicant did not intend to delete this subject matter from the claim, the recitation of lines 3-6 of the originally filed claim remains with claim 20.

### **ALLOWABLE SUBJECT MATTER**

Claims 20 and 22-24 are allowed.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The Examiner found no reference having a deformable projection within the chamber of a body of a medical device package that deforms upon contact with a medical device, and which is also frangible and breaks when the medical device is removed by a connector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JERROLD JOHNSON whose telephone number is (571)272-7141. The examiner can normally be reached on 9:30 to 6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 571-272-4562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
